

Early Purchase Option

At Clicklease, we're known for our custom flexible payment options. Our Early Purchase Option makes our financing even more flexible and commitment-free.

Some early purchase options are overly complicated. Ours is simple, with one purchase amount that doesn't change during the first 5 months.

How It Works:

1. Sign your lease agreement and pay any standard lease initiation fees. (These are non-refundable.)
2. Make your regularly scheduled payments.
3. At any point prior to your 5th regular monthly payment, make one payment of the entire original invoiced amount (Any payments already made are not deducted from the buyout amount.)
4. Your account is paid in full!

Example:

- Invoice = \$10,000
- Lease terms = 60 monthly payments of \$275
- Doc fee = \$299

If you use EPO after your first payment:

Purchase amount: \$10,000

Total amount paid: \$10,000 + \$299 doc fee
+ 1 payment = \$10,574 + taxes

If you use EPO after payment 2:

Purchase amount: \$10,000

Total amount paid: \$10,000 + \$299 doc fee
+ 2 payments = \$10,849 + taxes

If you use EPO after payment 4, but before payment 5:

Purchase amount: \$10,000

Total amount paid: \$10,000 + \$299 doc fee
+ 4 payments = \$11,399 + taxes
